## Blakely

The Blakely is a versatile contemporary style that suits a myriad of design applications. Its clean track arms are usually designed at five inches in width but can be thinned or widened to suit the length of the piece. This is a perfect design for modification, with two seats and two backs for smaller lengths or three cushions for longer lengths. If you lean more towards traditional design then keep welting on the body and cushions but if you want to take this towards modernity, then emphasize the clean lines of the sofa with simple seams and no welt.

84" length | 38" depth

19" seat height | 23" seat depth

25" arm height | 5" arm width

34" back height | 2" leg

### Fabric Notes

*Shown here in a protected leather but this cornerstone of transitional design looks stunning in any textile application.*
